

Hemant Rajendra Patil

Nashik, Maharashtra, India

hemant3366patil@gmail.com | 9325362672 | GitHub | LinkedIn

Professional Summary

Information Technology undergraduate skilled in Java, SQL, DBMS, React.js, JavaScript, MySQL, and MongoDB. Hands-on experience in building web applications, database-driven systems, and CRUD-based projects. Strong foundation in object-oriented programming, relational database design, normalization, query writing, and full-stack development. Interested in Java Backend Development, Database Engineering, and MERN stack development.

Education

B.E. in Information Technology

2024 – 2027

MET Institute of Engineering, Nashik

Savitribai Phule Pune University

First Year CGPA: 7.2

Second Year CGPA: 6.89

Higher Secondary Certificate (HSC)

2022 – 2023

Ratna Pruthvi Jr. College, Nagardeola

Percentage: 64.17%

Secondary School Certificate (SSC)

2020 – 2021

A.B. Boys High School, Chalisgaon

Percentage: 89.00%

Technical Skills

Programming Languages: Java, SQL, JavaScript, HTML, CSS

Frontend Technologies: React.js, HTML5, CSS3, Responsive Web Design

Databases: MySQL, MongoDB, DBMS, Normalization, Schema Design, Query Optimization

Tools and Platforms: Git, GitHub, VS Code, Eclipse, MySQL Workbench

Core Concepts: Object-Oriented Programming, Data Structures, CRUD Operations, Relational Database Design

Experience

MERN Stack Intern

2025

Supratech Pvt. Ltd., Nashik

- Worked on frontend development using React.js, JavaScript, HTML, and CSS.
- Created reusable UI components and improved web page structure for application modules.
- Used MongoDB for storing and managing application data.
- Gained practical exposure to MERN stack development and database-driven web applications.

CSR Head

2024

UNITY Student Association, MET BKC, Information Technology Department

- Led Corporate Social Responsibility initiatives and coordinated student activities.
- Managed communication, planning, and execution of department-level events.

Projects

Rx-Chain Health | Java, Spring Boot, React.js, Blockchain, MySQL

GitHub Repo | Live Rx-Chain

- Developed a blockchain-based healthcare system for securely managing and sharing patient medical records.
- Built the backend using Java and Spring Boot to handle patients, doctors, prescriptions, appointments, and healthcare data.
- Integrated blockchain technology to ensure data integrity, traceability, and protection against unauthorized modification.
- Implemented role-based access for patients, doctors, pharmacies, and insurance providers.
- Enabled consent-based data sharing, allowing patients to control who can access their medical information.

Personal Portfolio Website | React.js, HTML, CSS

GitHub Repo | Live Portfolio

- Created a responsive personal portfolio website to showcase projects, certifications, and technical skills.
- Designed sections for profile summary, education, projects, skills, and contact information.
- Improved personal branding by adding project links, GitHub profile, and portfolio details.

UTSAV - Event Management System | React.js, TypeScript, Tailwind CSS

GitHub Repo | Live Demo

- Developed a responsive event management frontend application using React.js and TypeScript with a modern, user-friendly interface.

- Designed multiple pages including Home, Events, Event Details, Organizer Dashboard, Authentication, and Registration with reusable React components.
- Implemented client-side routing, responsive layouts, and interactive UI elements to enhance user experience and maintain scalable frontend architecture.

ScanGrow - Tree Health Monitoring System | *React.js, TypeScript, Tailwind CSS* GitHub Repo | Live Demo

- Developed a responsive web application for monitoring and managing tree health with an intuitive dashboard and interactive user interface.
- Built modules for tree registration, QR code-based tree identification, health status tracking, volunteer participation, and maintenance records using reusable React components.
- Implemented client-side routing, responsive layouts, and role-based UI screens to provide a seamless experience across desktop and mobile devices.

SentinelX - SIEM Threat Detection Platform | *React.js, JavaScript, Python, SQLite3, CSS* GitHub Repo

- Developed a Security Information and Event Management (SIEM) platform to collect, analyze, and monitor security logs for real-time cyber threat detection.
- Implemented rule-based detection for security events including brute-force attacks, port scanning, DDoS attempts, suspicious administrator logins, privilege escalation, and malicious IP activity.
- Designed an interactive SOC dashboard featuring alert management, incident tracking, security reporting, and log visualization to support efficient security operations.

VoteWise - Smart Voting Guidance System | *React.js, TypeScript, Node.js, Express.js, MongoDB* GitHub Repo

- Developed a full-stack web application that helps voters make informed decisions by providing comprehensive candidate information, policies, and past performance.
- Built features for candidate profiles, side-by-side candidate comparison, and advanced search to enable users to evaluate candidates based on their preferences.
- Implemented a responsive React frontend with a Node.js, Express.js, and MongoDB backend, ensuring efficient data management and a seamless user experience.

Certifications

- NPTEL Elite Certification – Database Management System
- Spoken Tutorial Java Training – IIT Bombay
- E-Cell MET Idea Pitching Competition – Associated with IIT Bombay
- Smart MET Hackathon – Participant
- Projit National Level Hackathon – Participant

Languages

Marathi, Hindi, English
